& Asset Management

GFMAM COMMUNIQUE November 2021

The face-to-face meeting scheduled for the second half of 2021 was originally intended to be hosted by JIPM in Japan during November 2021. Due to the COVID-19 restrictions on travel, the meeting was held virtually instead with four intensive sessions scheduled over a two-week period.

In spite of the challenge with having representatives resident in time zones across the globe - from Western Canada on the one side to Eastern Australia on the other - a great rhythm has been established in terms of efficiently working on projects. The personal interaction is something that we miss and we have high hopes that a face-to-face meeting will become possible again in 2022.

GFMAM virtual group picture from top left to bottom right

TOP: Bob Kazar (SMRP), Naoki Takesue (JAAM), Christiaan Roberts (IAM), Mahmood Mirza (GSMR), Abdullah Abdul Rahman (MAPMA), Jean-Pierre Pascoli (PEMAC)

MIDDLE: Samira Ben-Ali (BEMAS), Vlad Bacalu (SMRP), Wim Vancauwenberghe (BEMAS), Cindy Snedden (PEMAC), Dave Daines (AMC), Zensuke Matsuda (JIPM), Jaakko Tennila (EFNMS)

BOTTOM: Susan Lubell (PEMAC), Wout Theuws (BEMAS & EFNMS), Joao Lafraia (ABRAMAN), Edmea Adell (IFRAMI) Tsutomu Nakamura (JIPM), Johannes Coetzee (SAAMA)

Progress on active projects:

GFMAM Guidance for an Asset Management System Scheme for Accredited Certification to ISO 55001

GFMAM has published a new document *GFMAM Guidance for an Asset Management System Scheme for Accredited Certification to ISO 55001* which is intended as a reference to potentially be used by Accreditation Bodies for ISO 55001.

Accreditation Schemes are normally developed and administered by individual Accreditation Bodies though they may collectively agree to utilise or mandate common Schemes.

Mandated Schemes currently exist for ISO 9001 and ISO 14001, but not ISO 55001. The original version of this document was created by the Asset Management Council in collaboration with JAS-ANZ, the Australian/New Zealand Accreditation Body, and in consultation with other professional organizations and Accreditation Bodies.

The GFMAM is grateful to the Asset Management Council who has contributed this work. The aim is to provide a reference Accreditation Scheme document which may be of interest to Accreditation Bodies around the world in pursuit of a common, global scheme.

Auditor Assessor Specification for an ISO 55001 Asset Management System Auditor/Assessor - Second Edition

Now in its Second Edition, the *Auditor Assessor Specification* document recommends baseline requirements for the Asset Management knowledge and understanding that an ISO assessor or auditor should have. GFMAM members will be recommending to asset owners that they apply 55001 this specification for internal assessors and require any external auditors to provide demonstrable evidence of this knowledge and understanding.

GFMAM Criteria for Evaluating Asset Management Indicators

GFMAM has published a new document, *Criteria for Evaluating Asset Management Indicators*, which identifies objective criteria and a methodology to assess whether a particular indicator is relevant to Asset Management. The methodology considers whether the indicator aligns with the 39 subjects of Asset Management (ref: The Asset Management Landscape – Second Edition, GFMAM) and whether it reflects the 9 benefits of Asset Management highlighted in the ISO 55000 standard (cf. ISO 55000: 2014 Asset management - Overview, principles and terminology, pages 1-2).

GFMAM Online Tool for Evaluating Asset Management Indicators

Aligned with this validation model, is an [online tool](#) which measures the relevance of an indicator to the principles and benefits of Asset Management actions and projects.

The online tool is provided by the GFMAM free of charge - an invitation to practitioners to engage in an ongoing project to develop and assess relevant Asset Management metrics. The project team will analyze and publish report(s) of the collated data on a periodic basis with the goal of continuously improving the tool and advancing the global discussion on the relevance of various Asset Management indicators.

Other projects currently active

The following projects are currently active and more detail will be shared in future communiques:

- Knowledge base modelling tool (Mapping of GFMAM documentation inclusive of ISO5500x)
- World Maintenance Day
- GFMAM Asset Management Landscape Revision

Next major meeting

The next major meeting will be during the first half of 2022 and is currently planned to be a face-to-face meeting in Australia if the Covid restrictions allows this. If not, this meeting will again be held virtually.
