

## GFMAM COMMUNIQUE – JUNE 2022

---

The face-to-face meeting scheduled for the first half of 2022 was originally intended to be hosted by the Asset Management Council (AMC) in Australia during June 2022. Due to the COVID-19 restrictions on travel, the meeting was held virtually instead with four intensive sessions scheduled over a two-week period in May.

In spite of the challenge with having our society representatives resident in time zones across the globe - from Western Canada on the one side to Eastern Australia on the other - a great rhythm was established in terms of efficiently communicating the GFMAM and member Societies activities. The personal interaction is something that we all greatly miss and we are looking forward to our next planned face-to-face meeting in the second half of 2022.

**BOTTOM ROW:** Paul Casto (SMRP), Mahmood Mirza (GSMR), Cindy Snedden (PEMAC)

## GFMAM New Publication:

GFMAM has published a new document *GFMAM Guidance for an Asset Management System Scheme for Accredited Certification to ISO 55001* which is intended as a reference to potentially be used by Accreditation Bodies for ISO 55001.

In addition, there are work groups in place for various aspects of the project which are meeting regularly and virtually. The groups are working on six different standards, with comments now received from all the countries.

## Progress on active GFMAM projects:

### Position Statement on Asset Management Maturity

GFMAM has completed this project and published it to the website.

### Global Maintenance Day

The first Global Maintenance Day will be promoted on June 9, 2023! GFMAM societies will work together to plan the celebrations.

### Asset Management Landscape Revision

This project is proceeding in phases, with phase 1 and 2 complete, phase 3 in progress and phases 4 to 6 scheduled for 2023.

### GFMAM Website Application for Evaluating Asset Management Indicators

The GFMAM will be both soliciting feedback and further promoting the tool amongst society members. The tool is approaching use by 100 users to date.
