

To be a worldwide community of organizations providing leadership for maintenance & asset management communities.

GFMAM PROJECTS

Since the **GFMAM** was created, several projects have been finalized and others are under development.

Some projects identifed as being of importance to the profession are available to all at www.gfmam.org

Auditor Assessor Specification

This document recommends a baseline for the Asset Management knowledge and understanding requirements that an ISO 55001 assessor or auditor should have. **GFMAM** members will be recommending to asset owners that they apply this specification for internal assessors and require any external auditors to provide demonstrable evidence of this knowledge and understanding.

Maintenance Framework

This document is intended to be used by members of the **GFMAM**, the Maintenance and Asset Management communities to provide:

- an overview of the discipline of maintenance management;
- a structure for the building of a body of knowledge for certification schemes and qualifications in maintenance management;
- a structure (and potentially the criteria) for assessing an organization's maturity in maintenance management;
- information for maintenance management knowledge requirements for assessors and auditors.

ASSET MANAGEMENT LANDSCAPE Version 2

The Asset Management Landscape is a tool to promote a common global approach to Asset Management. It includes a number of conceptual models, a list of 39 Asset Management Subjects and Principles and a framework for describing best practices, maturity and standards.

Two important purposes for the GFMAM Asset Management Landscape are to provide:

- the structure for building a body of knowledge for certification schemes and qualifications in asset management;
- the structure (and potentially the criteria) for assessing an organization.

Asset Management Maturity

Asset Management Maturity is the extent to which the capabilities, performance and ongoing assurance of an organisation are fit for purpose to meet the current and future needs of its stakeholders, including the ability of an organisation to foresee and respond to its operating context.

This document defines the key principles of Asset Management maturity. This position statement is not limited to the stages encountered on the way to meeting ISO 55001 requirements – it looks beyond compliance with ISO 55001 and considers the characteristics that organisations would exhibit at higher levels of maturity.

WHAT ARE THE BENEFITS OF GFMAM MEMBERSHIP?

- Strengthen the development of the maintenance and asset management profession in your association;
- Share the alignment of core concepts and understanding of good practices in the field of maintenance and asset management with others associations:
- Bring innovation in the maintenance and asset management fields through a multi-disciplinary, multi-cultural approach to your association;
- Develop additional products and services for your members;
- Develop meaningful partnerships and networks;
- Gain understanding of alternate approaches in other cultures & contexts;
- Gain information about trends in the field:
- Gain recognition for your international contributions as an association.

QUOTES FROM GFMAM MEMBERS

"With an increasing interest in Asset Management on the world stage, the GFMAM has an important role to play in providing an expert reference point for the provision of knowledge and understanding to established and emerging Asset Management and Maintenance societies".

Dave Daines

Asset Management Council, Australia

"GFMAM has facilitated for the first time collaboration and networking between all maintenance, reliability and asset management associations from all over the globe under one umbrella which is having a great positive impact on the growth of our societies as well as the maintenance and asset management profession in the world".

Nezar ShammasiGSMR, Arabian Gulf Region

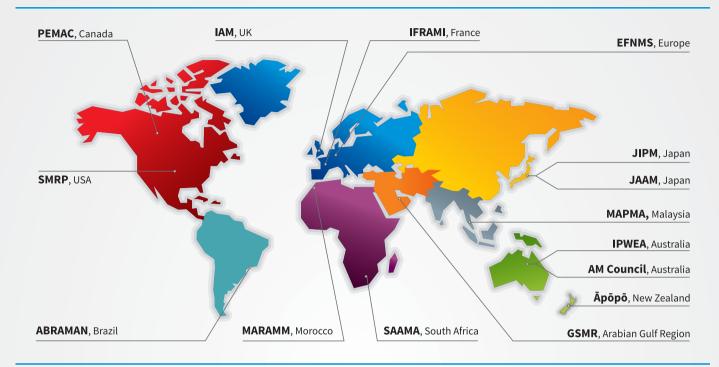

"Asset Management as a discipline has developed rapidly over the last 10 years and there are many examples of good practice and different interpretations of Asset Management around the world. The Global Forum enables the international community to come together to share these good practices and to develop consensus around the discipline. This is becoming increasingly important to the IAM's members, many of which operate in different countries across the world and recent publications like the GFMAM Asset Management Landscape and the position statement on Asset Management Maturity have helped the IAM to align its products and services with this international consensus"

Richard Edwards

IAM, The Institute of Asset Management

GFMAM Members

GFMAM

The Global Forum on Maintenance and Asset Management (GFMAM) is an association of professional maintenance and asset management societies formed for the purpose of knowledge creation and sharing and for information exchange among the member societies.

VISION

To be a worldwide community of organizations providing leadership for maintenance & asset management communities.

MISSION

To promote and develop the maintenance & asset management professions by collaborating on knowledge, standards and practices.

OBJECTIVES

To bring together, promote and strengthen the Maintenance and Asset Management community worldwide.

To support the establishment and development of associations or institutions whose aims are maintenance and/or asset management focused.

To facilitate the exchange and alignment of maintenance and asset management knowledge and practices.

To raise the credibility of member organisations by raising the profile of the Global Forum.
